# Leading in uncertain times

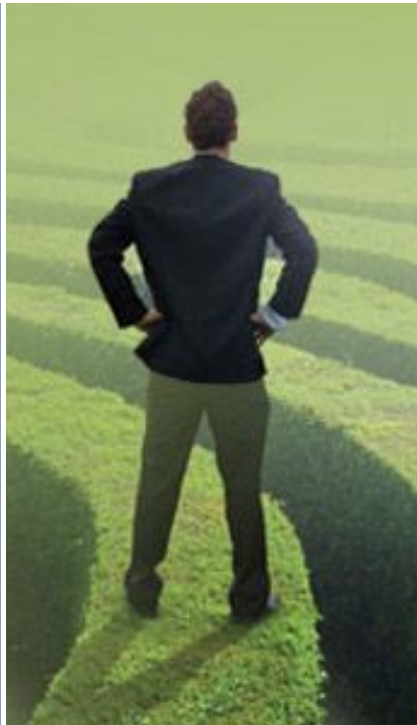

## LEADING IN UNCERTAIN TIMES

Nowadays companies are facing difficult times: economic crisis, financial stress, political uncertainty and vast social changes. Companies operating in Romania are not an exception.

Leading people and businesses has become an urgent necessity. It is time to make decisions and to take actions.

The key questions are two: How to make the best decisions? And what kind of Leadership is the most efficient to transform decisions into actions?

The program will deal with both challenges and help the participants to build a personal plan to improve as leaders.
